

CEDARS-SINAI MEDICAL CENTER.

16 June 2014

To Whom It May Concern:

Cedars-Sinai Medical Center entered into an agreement with Assisted Home Health Care earlier this year for the purpose of providing home health services for patients upon discharge from the hospital.

During the initial months of this Program, Assisted Home Health Care providing excellent service with timely intervention, high quality services, and outstanding communication while also demonstrates an absolute commitment to ensuring that the patients received seamless transitional care. The efforts of Assisted's staff, both those on-site at the Medical Center and those providing care in the home, resulted in very high patient satisfaction and very low readmission rates.

Although our collaboration is relatively new, we are extremely pleased with the choice we made and look forward to expanding the program over the coming months. We believe that partnering with Assisted Home Health Care was a positive step for the Medical Center and a true benefit for our patients.

Please let me know if there is any further information that you need.

Thank you.

Sincerely yours,

David Esquith, LCSW, MPA, ACM
